# MANUFACTURING

## QUALITY AND STYLE

**Two manufacturing processes –  
two results: quality and style |**

**1 Foams** For more elaborate, 3-dimensional forms with love for detail, we use aluminium moulds in which high-density polyurethane foam (ARSTYL®) is injected, resulting in precisely manufactured design elements particularly rich in detail or austere modern. We use this process also to produce our special FLEX mouldings as well as design elements (DOMOSTYL®) which are suitable for outdoor use.

**2 Extrusion** In the extrusion process, polystyrene is moulded in medium and high density to light (NOMASTYL®) or shock-resistant (WALLSTYL®) design elements. All design elements manufactured by means of extrusion are moreover waterproof and can therefore be used in damp areas without hesitation. Gluing surfaces and a primer facilitate the subsequent processing.

Whatever design elements you opt for, engineers, designers and staff are constantly working in development and production to meet the quality requirements of NOËL & MARQUET. Over 70 years of experience and a distinctly innovative spirit make the appeal, authenticity and quality of NOËL & MARQUET products simply unique.

**Due processi di produzione, due risultati:  
qualità e stile |**

**1 Espansione** Per le forme tridimensionali più elaborate, spronati dalla nostra passione per i dettagli, utilizziamo stampi di alluminio nei quali viene iniettata “schiuma” di poliuretano ad alta densità (ARSTYL®). Il risultato: elementi decorativi di altissima precisione, ricchi di particolari o, al contrario, improntati ad essenziale modernismo. Utilizziamo lo stesso processo per produrre i nostri profili flessibili FLEX ed altri elementi decorativi (DOMOSTYL®) adatti per l'uso all'aperto.

**2 Estrusione** Il processo di estrusione permette di ottenere elementi decorativi sia leggeri (NOMASTYL®) sia resistenti (WALLSTYL®) a partire da polistirolo a media e alta densità. Inoltre, tutti gli elementi decorativi prodotti mediante estrusione sono resistenti all'acqua e possono pertanto essere utilizzati senza la minima esitazione in tutti gli ambienti umidi. Le superfici di incollaggio zigrinate e primerizzate in fabbrica ne agevolano la posa in opera successiva.

Qualunque elemento decorativo scegliate, siete sicuri che nei dipartimenti Sviluppo e Produzione, ingegneri, designer e collaboratori si impegnano continuamente per soddisfare gli elevati standard di qualità di NOËL & MARQUET. Oltre 70 anni di esperienza e uno spiccato spirito innovativo rendono i prodotti NOËL & MARQUET decisamente unici per attrattiva, autenticità e qualità.

## Dos procesos de fabricación, dos resultados: calidad y estilo |

**1 Espumas** Para las formas tridimensionales más complejas, utilizamos, con esmero para los detalles, moldes de aluminio donde se ha inyectado espuma de poliuretano de alta densidad (ARSTYL®), obteniendo elementos de diseño producidos con precisión, particularmente ricos en detalles o bien de un modernismo depurado. Utilizamos el mismo proceso para la producción de nuestros perfiles especiales FLEX y elementos decorativos adecuados para uso en exteriores (DOMOSTYL®).

**2 Extrusión** En el proceso de extrusión, el poliestireno es moldeado a densidad media o alta para obtener elementos de diseño ligeros (NOMASTYL®) o resistentes (WALLSTYL®). Todos los elementos decorativos hechos por extrusión también son resistentes al agua y, por lo tanto, perfectamente utilizables en habitaciones húmedas. Las superficies de unión fresadas y la capa de imprimación aplicada en fábrica facilitan la instalación posterior. Cualquiera que sea el elemento de diseño que elijas, en el Departamento de Desarrollo y Producción los ingenieros, los diseñadores y todo el personal velan constantemente por responder a las exigencias en materia de calidad de la marca NOËL & MARQUET. La combinación de más de 70 años de experiencia con el espíritu altamente innovador del grupo hace que los productos NOËL & MARQUET sean absolutamente únicos en su atractivo, autenticidad y calidad.

## Dois processos de fabrico, dois resultados: qualidade e estilo |

**1 Espumas** Para as formas tridimensionais relativamente complexas, usamos, com gosto pelos detalhes, moldes de alumínio nos quais é injetada espuma de poliuretano de alta densidade (ARSTYL®). Usamos este processo também para produzir as nossas molduras FLEX especiais, bem como os elementos decorativos (DOMOSTYL®) que podem ser utilizados no exterior.

**2 Extrusão** A extrusão consiste em formar elementos decorativos leves (NOMASTYL®) ou resistentes (WALLSTYL®) a partir de poliestireno de média ou alta densidade. Todos os elementos decorativos fabricados por extrusão também são resistentes à água e, portanto, podem ser usados sem hesitação em ambientes húmidos. As superfícies de colagem fresadas e o revestimento primário aplicado no seu fabrico facilitam a instalação subsequente. Seja qual for a sua escolha entre os elementos decorativos: nos departamentos de Desenvolvimento e Produção, engenheiros, designers e colaboradores atendem sempre aos requisitos de qualidade da marca NOËL & MARQUET. A longa experiência de mais de 70 anos e o espírito altamente inovador do grupo tornam os produtos NOËL & MARQUET absolutamente únicos pelo seu apelo, autenticidade e qualidade.

# CORNICES

CORNICI

MOLDURAS DE TECHO

SANCAS

**Create a completely new spatial effect with our cornices.** They create an elegant and aesthetic transition between walls and ceilings. The spatial effect can vary depending on the cornice and the mounting. Cornices – many of which are for that matter suitable for the integration of direct or indirect lighting – can moreover be used to conceal unsightly transitions, cracks and smaller cables.

**Con le nostre cornici, potete personalizzare lo stile del vostro interno, rimodulandone lo spazio.**

Permettono di creare una transizione elegante ed estetica tra pareti e soffitto. L'effetto varia a seconda del profilo e della posizione della cornice. Le cornici, molte delle quali sono predisposte per l'integrazione di sistemi di illuminazione diretta o indiretta, permettono inoltre di nascondere imperfezioni, fessure, cavi ed altri inestetismi.

**Gracias a nuestras molduras de techo, puede cambiar a voluntad la atmósfera de su espacio interior.**

Forman una transición estética y elegante entre la pared y el techo. El efecto espacial varía según el perfil y la disposición de la moldura. Las molduras de techo, muchas de las cuales son adecuadas para integrar la iluminación directa e indirecta, también le permiten ocultar pasajes antiestéticos, grietas y pequeños cables.

**Crie um efeito espacial completamente novo com as nossas sancas.**

Criam uma transição elegante e estética entre paredes e tetos. O efeito espacial pode variar dependendo da sanca e da montagem. As sancas, muitas das quais adequadas para a integração de iluminação direta e indireta, também permitem esconder passagens, fissuras e pequenos cabos inestéticos.
